Subject: Adaptive Lossless Data Compression Algorithm (ALDC)

Dear Ms. Barra

In the event the proposed standard is adopted and the standard cannot
be practiced without the use of one or more issued patents, including
design patents for type fonts, but excluding other design patents
which are now or hereafter owned or controlled by IBM, IBM agrees upon
a request to grant a non-exclusive license under such patent or patents
on a non-discriminatory basis and on reasonable terms and conditions
including its then current royalty rates and provided a similar grant
under license's patents within the scope of the license granted to
license is made available upon request to IBM.

A more specific statement on the license IBM is willing to grant can
be obtained by ANSI, upon request, when the proposed standard is in
final form, ready for adoption. Such request should be submitted to:

        IBM Director of Licensing
        International Business Machines Corporation
        500 Columbus Avenue
        Thornwood, New York 10594

If you require any further information in this regard, please let me know.

                    Sincerely yours,

                    Kevin J. Reardon
                    Lab Director
