## INCITS Project Proposal Template

When a project is proposed to develop a new or revised INCITS standard or technical report, a project proposal must be submitted for review and approval.

A project proposal may be submitted by any individual or organization whether or not they are affiliated with INCITS.

A project proposal using this template is required for the:

- Development of new or revised American National Standards, Amendments, Supplements and Erratum;
- Development of a INCITS technical report; and
- Submission of a candidate standard for INCITS Fast Track processing as an American National Standard.

Proposals shall be submitted to the INCITS Secretariat using the following template:

---

### 1. Project Information Summary

#### 1.1 Title of proposed project

Provide a descriptive subject matter title. The title shall clearly and concisely indicate the field of technical activity.

Fibre Channel - Link Services - 5

#### 1.2 Date Submitted

The submission date of the project proposal.

April 11, 2019

#### 1.3 Proposer(s)

List the INCITS Organizational Entity, Fast Track Submitter, or other external organization.

INCITS Technical Committee T11

### 2. Description of the Proposed Project

#### 2.1 Project Intent

There are three types of projects when submitting a project proposal. Please choose **one** item below:

- Development project - a new standard, amendment, supplement, or erratum
- Revision project - a revision to an existing standard
- Technical Report project - an INCITS Technical Report (choose one type below)
  - to be an INCITS Technical Report
  - to be an INCITS Technical Report that is registered with ANSI

#### 2.2 International Processing Intent

Is there intent to submit the standard (once approved) for consideration as an ISO/IEC JTC 1 or ISO standard?

Yes

### 2.3 Scope

What is the technical scope of the work? Other potential participants will need to understand the scope in order to decide whether or how to participate in this project.

Fibre Channel Extended Link Services provide an invaluable service for management and control of Fibre Channel systems. This project proposal recommends the development of additional and enhanced Extended Link Services functions to the Extended Link Services defined in the FC-LS-4 standard. The specific goals of the FC-LS-5 standard are to:

- a) specify new ELSs for Fabric congestion detection and avoidance; and
- b) specify new and/or amended Link Services as required by T11 standards work groups.

### 2.4 Recommended INCITS Development Technical Committee

Indicate a preference for assignment of the proposed project to an existing INCITS Technical Committee, or propose creation of a new INCITS TC. Consult the INCITS Secretariat if a new INCITS TC is proposed.

It is recommended that this project be assigned to TC T11, in order that the project be coordinated with work on other Fibre Channel standards.

### 2.5 Target Date for Initial Public Review (Milestone 4)

Estimate the target date for releasing the draft document for public review (described as Milestone 4 in the INCITS Organization, Policies and Procedures).

April 2021

### 2.6 Project Editor

Include complete contact details.

Craig Carlson - [cwcarlson@marvell.com](mailto:cwcarlson@marvell.com) - 952-687-2431

### 2.7 Units of Measurement

Indicate all units of measurement used.

- Metric
- US (Inch/Pound)
- Not Applicable

## 3. Business Case for Developing the Proposed Standard or Technical Report

### 3.1 Project Need

Briefly identify why a standard is needed, rather than another kind of solution. Describe existing practice in the area of a proposed document to aid in judging timeliness and appropriateness of the project. Address the expected stability of the proposed document with respect to both current technology and potential technological advances.

Current Fibre Channel Extended Link Services are defined in the FC-LS-4 standard. Requests for additional and enhanced Extended Link Services functions are coming from existing and new implementation areas of Fibre Channel.

### 3.2 Identify Stakeholders

Identify the stakeholders (e.g., telecom, consumer, etc.) likely to be directly impacted by this standard or technical report.

Stakeholders for this project include Fibre Channel vendors and Fibre Channel consumers.

### 3.3 Estimated Useful Life

Estimate the useful life of the standard or technical report.

It is anticipated that this standard will have a useful life of over 10 years.

## 4. Legal Considerations

### 4.1 Patents

Calls will be made to identify assertions of patent rights in accordance with the relevant INCITS, ANSI and ISO/IEC policies and procedures. Is the proposer aware of any patent assertions that may be made? If so, describe.

No

### 4.2 Copyright question

Are there any copyright considerations with respect to contributions expected for this project?

No

## 5. Related Standards Activities

### 5.1 Existing Standards

Identify existing standards, technical reports, relevant reference models, frameworks, architectures, etc., (including but not limited to INCITS, ANSI, ISO/IEC/JTC 1 and ISO) that may affect or be affected by the proposed project and any known or anticipated areas of conformance or conflict.

None known.

### 5.2 Related Activity

Identify projects under development (including but not limited to INCITS, ANSI, ISO/IEC/JTC 1 and ISO) that may affect or be affected by the proposed project. For each project identified, indicate if the liaison arrangements have been made with these activities.

None known.

### 5.3 Participation

Are there any known organizations or associations interested in this work outside of INCITS? Provide a list if possible.

None known.

### 5.4 Public notification

A notice will be published in ANSI Standards Action announcing the new project and to solicit new consensus body members. Notice of the newly approved project will also be announced via the social media accounts. Are there other places where this development should be announced (i.e., news outlets, conferences)?

FCIA, SNIA
