Dear Rachel,

The T11 committee has prepared a project proposal for an INCITS standard entitled "Persistent Memory over Fibre Channel (FC-PM)".

This project proposal recommends the development of a standard for supporting Persistent Memory over Fibre Channel. Included within this scope are:

- a) Additions as needed for development of FC-PM; and
- b) Any other items as deemed necessary during the development of FC-PM.

This project proposal revises and supersedes the original FC-RDMA project proposal and will continue to use the same designation of INCITS 564.

The project proposal was noted for consideration on the August 2020 meeting's draft agenda; document T11-2020-00154-v001.

The project proposal is contained in document T11-2020-00162-v000. At the August 13, 2020 meeting of T11 held virtually, Craig Carlson (Marvell) moved and Dave Peterson (Broadcom) seconded to approve T11-2020-00162-v000 as the project proposal for FC-PM and to forward T11-2020-00162-v000 to INCITS for further processing as the project proposal for FC-PM. This requires a 2/3 meeting vote. The motion carried Yes -17, No-0, Abstain-0, and NV-1

The vote is recorded in clause 11.2.1 of the August 2020 T11 draft plenary minutes, T11-2020-00185-v000.

Could you please take the appropriate steps to carry forward the recommendation of T11 and accept the project as a standard to be developed within T11?

Thank you very much for your assistance in this matter.

Sincerely,

Steven Wilson

INCITS TC T11 Chairman
