

# **Joint T11.2/T11.3Ad Hoc Group Meeting Report April 2021**

- Met on Wednesday April 7<sup>th</sup> from 12:30pm to 1:30pm (PST)
- **How link recovery times affect FC-SB-6 environments, Roger Hathorn, IBM, T11-2021-091-v0**
  1. The 64GFC link bring up times are much longer than previous speeds which were less than 1.5 seconds. The estimate for 64GFC link bringup times is on the order of 6 to 10 seconds.
    1. It is anticipated that the 128GFC link bringup times will be even longer than this.
  2. It was reviewed how these long link bringup times will impact system level timers.
  3. The long link recovery times will cause higher level issues from a system perspective.
  4. Further brainstorming will be done but there does not appear to be an easy way to reduce the times.

**T11-2021-108-v0**

# **Joint T11.2/T11.3 Ad Hoc Group Meeting requests April 2021**

- **Future meeting schedule**
