

Joint T11.2/T11.3 Ad Hoc Group Meeting Report October 2021

- **Met on Wednesday October 6, from 1:30 to 2:30**
- **64GFC LSN roadblocks for Analog CDR implementation, Mike Klempa, Amphenol, T11-2021-263-v0**
 1. Concern that LSN times using 64GFC ICs at 32GFC cannot support the link up times specified in the standard
 2. Discussion about how the times in FC-FS-5 table 29 can be measured
 3. Overall good discussion about what different companies are seeing the lab trying to bring up 64GFC modules
 4. Because of backward compatibility and existing modules there really isn't anything that can be changed/modified regarding 64GFC
 5. There was a discussion that if any of this information can be used to help make 128GFC standard easier to understand.

T11-2021-289-v0
