Subject: Report for the 2023 10-Year Continued Stabilized Maintenance of INCITS Standards

Due Date: Committee Position and Vote Due February 28, 2023

This report addresses INCITS standards that were stabilized 10 years ago and the associated requirements to maintain a stabilized standard.

The INCITS Organization, Policies and Procedures state the process for stabilized standards. Section 6.2.6 (2nd to last paragraph) outlines the required 10-year review, as follows:

An American National Standard maintained under the stabilized maintenance option shall be subject to further review of such status on a 10-year cycle. If it is determined in connection with this review that the standard should continue to be maintained under the stabilized maintenance option and does not require revision or withdrawal, then the INCITS Secretariat shall inform ANSI, which will place an announcement in the ANSI Standards Action publication.

Action: The standards below were stabilized in 2013. The applicable TC is being asked to determine if the standards should continue the stabilized status for another 10-year cycle or if other action should be taken. If other action is recommended, the rationale for such action shall be included. The TC vote to either continue the stabilized status or take other action should be submitted to the Secretariat by the due date.

Appended here is the complete list of standards requiring action. The INCITS Secretariat has established action items for each committee referenced.

Reference the [INCITS Procedures](#) for specific requirements that may be necessary when selecting one of the above options.
