ACS-6 is the next generation of the ATA Command Set standards. It follows ATA8-ACS, ACS-2, ACS-3, and ACS-4, and ACS-5. ACS-6 would: document the command set implemented by devices that support the ATA architecture; address new features that were not sufficiently developed for ACS-5; address any other proposals or modifications to the command set suggested or proposed by a T13 committee member; and other capabilities that may fit within the scope of this project.
