To:	INCITS Technical Committee Chairs of: B10, B11, CS1, DM32.2, DM32.8, H3, L1, L2, L3, M1, PL22, PL22.4, PL22.11, T3, T10, T11, T13, V1, W1, Executive Board
Subject:	Updated Status of 2012 Five-Year Maintenance Review of INCITS National Standards
Due Date:	Recommendations Due by June 27, 2012

In accordance with ANSI and INCITS policy, action must be taken during the four-year anniversary of a standard's approval date to reaffirm, stabilize or withdraw the standard. Five-year maintenance actions should be completed before the end of the fifth year.

The TCs should review the attached list, identify the standards that pertain to their committee and submit to the INCITS Secretariat approved recommendations to reaffirm, withdraw or stabilize each standard noted for their committee. This review should include providing recommendations on any associated amendments and corrigenda.

If a recommendation is not forthcoming from the technical committee, the INCITS Executive Board shall make a recommendation on this issue without the benefit of the Technical Committee's input at their July 2012 meeting.

If the recommendation is for **reaffirmation**, a meeting vote or 30-day ballot (with two-thirds approval criteria) should be conducted.

If the recommendation is for **revision**, a meeting vote or 30-day ballot (with two-thirds approval criteria) should be conducted. This action shall include a project proposal describing that the proposed revision should be submitted with the recommendation to reaffirm, pending revision. If a standard is currently under revision, the customary four-year action would be reaffirmation of the current standard, pending completion of the revision.

If the recommendation is for **stabilization**, roll-call vote or 30-day ballot (with two-thirds approval criteria) should be conducted and the following requirements shall be met:

- The standard addresses mature technology or practices, and as a result, is not likely to require revision; and
- The standard is other than safety or health related; and
- The standard currently holds the status of American National Standard and has been reaffirmed at least once; and
- At least ten years have passed (exact date of approval and ten years out) since the approval or last revision of the standard as an ANS; and
- The standard is required for use in connection with existing implementations or for reference purposes.

If the recommendation is for **withdrawal**, a roll-call vote or 30-day ballot (with two-thirds approval criteria) should be conducted with a rationale for the withdrawal.
