Re: INCITS Project 1711-D, SCSI / ATA Translation (SAT)

Dear John:

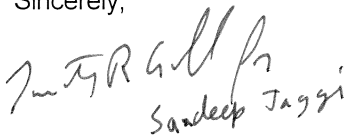

LSI Logic Corporation ("LSI Logic") owns U.S. Patent No. 6,925,519 (the '519 patent) and believes the '519 patent may be applicable to the proposed SCSI/ATA Translation (SAT) standard.

In the event ANSI approves and adopts the proposed SAT standard, and that standard cannot be practiced without the use of the '519 patent, LSI Logic will make a limited non-exclusive license available, upon written request, to practice the '519 patent for the sole purpose of implementing the SAT standard in products that are fully compliant with the SAT standard as adopted. The license will be offered on a non-discriminatory basis and on reasonable terms and conditions provided the potential licensee will make available to LSI Logic a comparable cross-license under any of the licensee's patents that apply, or could potentially apply, to LSI Logic's products.

Inquiries regarding a license under the '519 patent should be sent to:

Sandeep Jaggi
Vice President and Chief Intellectual Property Counsel
LSI Logic Corporation
