Dear Rachel,

The T11 committee has prepared a project proposal for an INCITS technical report entitled "Technical Report for Information technology - Fibre Channel - Energy Efficiency (FC-EE-TR)".

The work in the existing FC-EE project INCITS 486-201x has been completed by TC T11. However there will be no specification created from that project as the work in this group has been included in other existing T11 standards. Therefore TC T11 would like to transition this project to be a technical report that simply references the FC-EE clauses in the other FC standards (FC-FS-4, FC-SW-6, FC-LS-3).

Furthermore, since this will be an informational technical report that only references FC-EE clauses that are in other standards, TC T11 is requesting that this technical report be freely offered by INCITS.

The project proposal was noted for consideration on the meeting's agenda, document T11/15-414v1.

The project proposal is contained in document T11/15-421v0. At the December 10, 2015 meeting of T11 held in Dallas, TX, Steve Wilson (Brocade) moved and Jay Neer (Molex) seconded to approve T11/15-421v0 as the project proposal for FC-EE-TR and to forward T11/15-421v0 to INCITS for further processing as the project proposal for FC-EE-TR. This requires a 2/3 meeting vote. The motion passed with 17 Favoring, 0 Opposing, 2 Abstaining, and 2 Not Voting.

The vote is recorded in clause 12.2.1 of the December 2015 T11 plenary minutes, T11/16-005v0.

Could you please take the appropriate steps to carry forward the recommendation of T11 and accept the project as a technical report to be developed within T11?

Thank you very much for your assistance in this matter.

Sincerely,

Steven Wilson, Chair INCITS TC T11
