

Comment #	Tech/Edit	Page #	Section	Comment	Proposed Solution
VMW-1	T	30	6.5.1.3.4 OSDeviceName	Need to include vSphere as an OS in Table 1 — Preferred format for SMHBA2_PortAttributes OSDeviceName.	Add a row to Table 1 that includes the following values: "vSphere" in the 'OS' column, "vmhba*" in the 'Local end port' column "(zero length string)" in the 'Discovered end port' column
VMW-2	T	62	6.10.2.9 OSDeviceName	Need to include vSphere as an OS in Table 4 — Preferred format for logical unit OSDeviceName.	Add a row to Table 4 that includes the following values: "vSphere" in the 'OS' column, "/dev/disks/b" in the 'disk/optical' column "(zero length string)" in the 'cd-rom' column "(zero length string)" in the 'tape' column "(zero length string)" in the 'changer' column Add a sentence under footnote 'a' that states "Italicized lower case b represents the null terminated string created from the designator/identifier field associated with the logical unit in the Device Identification VPD page."
