

# 1 Fabric\_Name in Membership Set Descriptor

## 17.7.2.12 Membership Set Descriptor

The format of the Membership Set descriptor is shown in table 1.

**Table 1 – Membership Set Descriptor Format**

Item	Size (Bytes)
Tag Value = 000Bh	4
Length = variable	4
<a href="#">Fabric_Name</a>	8
Primary Controlling Switch Switch_Name	8
Secondary Controlling Switch Switch_Name	8
Number of FCDFs (n)	4
FCDF Switch_Name #1	8
FCDF Switch_Name #2	8
...	
FCDF Switch_Name #n	8

**Fabric\_Name:** contains the Fabric\_Name of the Fabric the Distributed Switch belongs to.

**Primary Controlling Switch Switch\_Name:** contains the Switch\_Name of the Primary Controlling Switch.

**Secondary Controlling Switch Switch\_Name:** contains the Switch\_Name of the Secondary Controlling Switch. This field shall be set to 00000000 00000000h when there is no Secondary Controlling Switch.

**Number of FCDFs:** contains the number of FCDF Switch\_Names that follow. This list of FCDF Switch\_Names is the FCDF Set of the Distributed Switch. If the number of FCDF Switch\_Names is zero, then any FCDF is allowed in the Distributed Switch.
