**Proposed Revised Clause 4 for FC-PI-6
Richard Johnson**

5 May 2013

T11/13-197v0

Issue

- ◆ Most of the content of Clause 4 can be found in FC-PI
- ◆ As test issues evolved, the wording has only minimally changed
- ◆ The Finisar proposal for revised text is given in T11/13-198v0.

Terminology

- Interoperability point: located at a separable connector
- Compliance point: location where performance must be measured and meet requirements
- FC-PI: Interoperability point = Compliance point
- Finisar objection: not true

Finisar proposal

- Make a clear distinction between interoperability point and compliance point
(Some minor reordering of sentences and paragraphs)
- New paragraph proposed to discuss compliance point
- Remove detailed interoperability discussion in subclause 4.13; move this to FC-MSQS-2
