

**STATEMENT OF PATENT HOLDER CONCERNING THE USE OF
PATENTED DEVICE OR DESIGN IN CONJUNCTION WITH AN
AMERICAN NATIONAL STANDARD**

Note: This form is to be used to record the statement of a patent holder whose patented device or design (pending or approved) may have to be used by a person or organization complying with an American National Standard. This statement is filed and retained pursuant to clause 1.2.11.2 of the *American National Standards Institute Procedures for the Development and Coordination of American National Standards*.

1. Name of Patent Holder: Mr. Shao Tong , Chairman of Nanjing E-Security Technology Co., Ltd

Address: Rm.D05,Multi-Functional Bldg.,Gate 3
Nanjing University of Science and Technology
#200 XiaoLingWei, XuanWu District, Nanjing, Jiangsu 210014
China

Contact Name and Title: Mr. Tom Lee, Manager

Contact Telephone & Facsimile: (86-25) 4318612 & 4318693

Contact Email: litianming@china-esc.com

2. Patent Number(s):

Patent Number	Pending or Approved	Date of Expiration
ZL94111461.9/G06F 12/00	Approved	Oct. 06, 2014

3. Designation and Title of Proposed ANSI Standard: ATA/ATAPI of T13

List sections of standard to which patent claims relate: Command --Set Max Address

4. Statement of Patent Holder:

Please check one of the following statements:

- a) A license shall be made available without compensation to the applicants desiring to utilize the license for the purpose of implementing the standard.
- b) A license will be made available to applicants under reasonable terms and conditions that are demonstrably free of any unfair discrimination.
- c) The patentee does not hold and does not anticipate holding any invention the use of which would be required for compliance with the proposed American National Standard.

Signed:

Rp Tj Shapton
(Name)

Chairman of the Board
(Title)

Company: Nanjing E-Security Technology Co., Ltd

Date: *March 1, 2002*

Subject: Patent violation

Dear Peter,

We are very surprised to have found that the command of "SET MAX ADDRESS" in ATA/ATAPI from V4 on edited by you violates our patent in China owned by our company(Patent No.94111461 and Certification No.55089). We think that all the hard disks made according to the standard and sold to China have violated our patent right and we are going to sue some hard disk manufacturer to defend our right.

Anyway, we think the most important thing is to cooperate. We expect that the command will be very critical to computer security in e-business time though it needs much more improvement to realize the functions we need for our future e-security PC, which will realize the real time online transition between the internal LAN and external WAN with bulletproof physical separation at the lowest hardware layer to be the basic platform for e-business, e-economy and e-society.

We are producing PC e-security cards(PC E-SC), based upon our patent, that divide one PC into two virtual ones, realizing the absolute separation between the safe and un-safe environments in a PC to meet the great demands for both information acquirement and data security from government, military defense, banking, insurance, tele-communication and enterprises. PC E-SC is necessary to the future E-Security PC and e-business end users; security solution, for it realizes the read and write protection on hard disk by the way of hardware, guaranteeing the absolute security for the one-way data transfer from Internet to end users with lower cost and wide applications.

We do hope to cooperate with you or other hard disk makers to realize our patented technology totally in hard disk drives to make our cards more secure, compatible and reliable. Look forward to your kind reply.

Best regards,

Tom Lee
