Disclosure of Patents Relevant To Matters Before the Committee

Apple Computer is aware of two granted patents that may be relevant to the implementation of standards in the T13 committee. In accordance with the ANSI/INCITS patent policy, Apple Computer discloses US Patents 6,520,013 "Method And Apparatus For Detecting Free Fall" and US 6,768,066 "Method And Apparatus For Detecting Free Fall."

At this time, Apple has made no decision about licensing these two patents and cannot confirm it will comply with ANSI patent policy on this matter.

Apple Computer originally answered the call for patents verbally at the April, 2006 meeting concerning this matter.

Sincerely,

Larry Barras
Apple Computer
