Re: Licensing Statement for T10/2212-D – Serial Attached SCSI - 3

Dear Mr. Lohmeyer,

On behalf of the above company, and being authorized by the company to make such representations, we indicate the following:

Molex Incorporated is participating in Project T10/2212-D, which is developing Serial Attached SCSI – 3 (“SAS-3”) Standard. If the proposed standard is adopted by ANSI as a standard and if Molex owns patents or patent applications (IP) that contain claims that are required for practicing the SAS-3 Standard, then Molex is prepared to offer a license to such IP to the extent the IP is required to implement the SAS-3 Standard. Such a patent license would be non-exclusive and offered under reasonable, non-discriminatory (RAND) terms and conditions to all willing licensees. Molex reserves the right to refuse to license a party that purposely refuses to accept such license after receiving notice of same.
