Colorado Springs, CO 80907

Re: Licensing Statement for T10 SBC-3 and SPC-4 Standards

Dear Mr. Lohmeyer:

As you are likely aware, LSI Corporation is participating in the development of the T10 SBC-3 (SCSI Block Commands) Standard, and the T10 SPC-4 (SCSI Primary Commands) Standard. If either the SBC-3 or SPC-4 or both of the proposed standards are adopted by ANSI as standards, and if any LSI owned patents or patent applications contain claims that are required for practicing either or both of these standards, LSI is prepared to offer a license to such patents and patent applications to the extent required to implement either or both of these standards. Such a patent license would be non-exclusive and offered under reasonable, non-discriminatory (RAND) terms and conditions, subject to receipt by LSI of a reciprocal license from the licensee.

Any party wanting to request a license should submit that request in writing to me at the address provided above.

Sincerely,

A handwritten signature in blue ink, appearing to read "Warren K. Waskiewicz", with a long horizontal flourish extending to the right.

Warren K. Waskiewicz
Vice President, IP Licensing
